- Our people, tools and techniques can enhance and unify the sonic experience of any production to help bring a player or viewer into an alternate reality and keep them there.
- We offer services to expand and refine the visual presentation of a production as well.
- We provide individual services or customized packages to fit productions and budgets of all sizes and levels.

# SOUND RECORDING

## RECORDING STAGES

Our sound recording stages can accommodate individual or group actor recordings for VO, ADR, and Loop Group sessions.

## SERVICES

We also offer voice casting, supervision and treatment of recorded media.

## QUALITY

All recordings are performed at the highest industry standards with professional grade equipment and microphones.

## EXPERIENCED

We service productions at all levels and often record celebrity or A-level talent for studio produced feature films and TV series.

## ENGINEERS

Engineers are professionally trained and experienced working with directors, producers, and actors of all levels.

# SOUND EDITING

Apex Post provides sound editorial services suitable for use on productions of all levels and genres.

Our work includes traditional sound effects selection and placement, foley recording, sound design and creature effects, ambience and location enhancement, music editorial, and original field recordings specific to filmed or created environments.

Our work is synchronized to picture and also provided as source material for interactive media and gaming.

# AUDIO RESTORATION

"OUR GOAL IS TO HELP CREATE A CONTINUOUS EXPERIENCE, VOID OF UNINTENTIONAL DISTRACTIONS."

Apex Post provides audio restoration, noise removal, sound enhancement and digital "clean-up" of compromised original or deteriorated recordings.

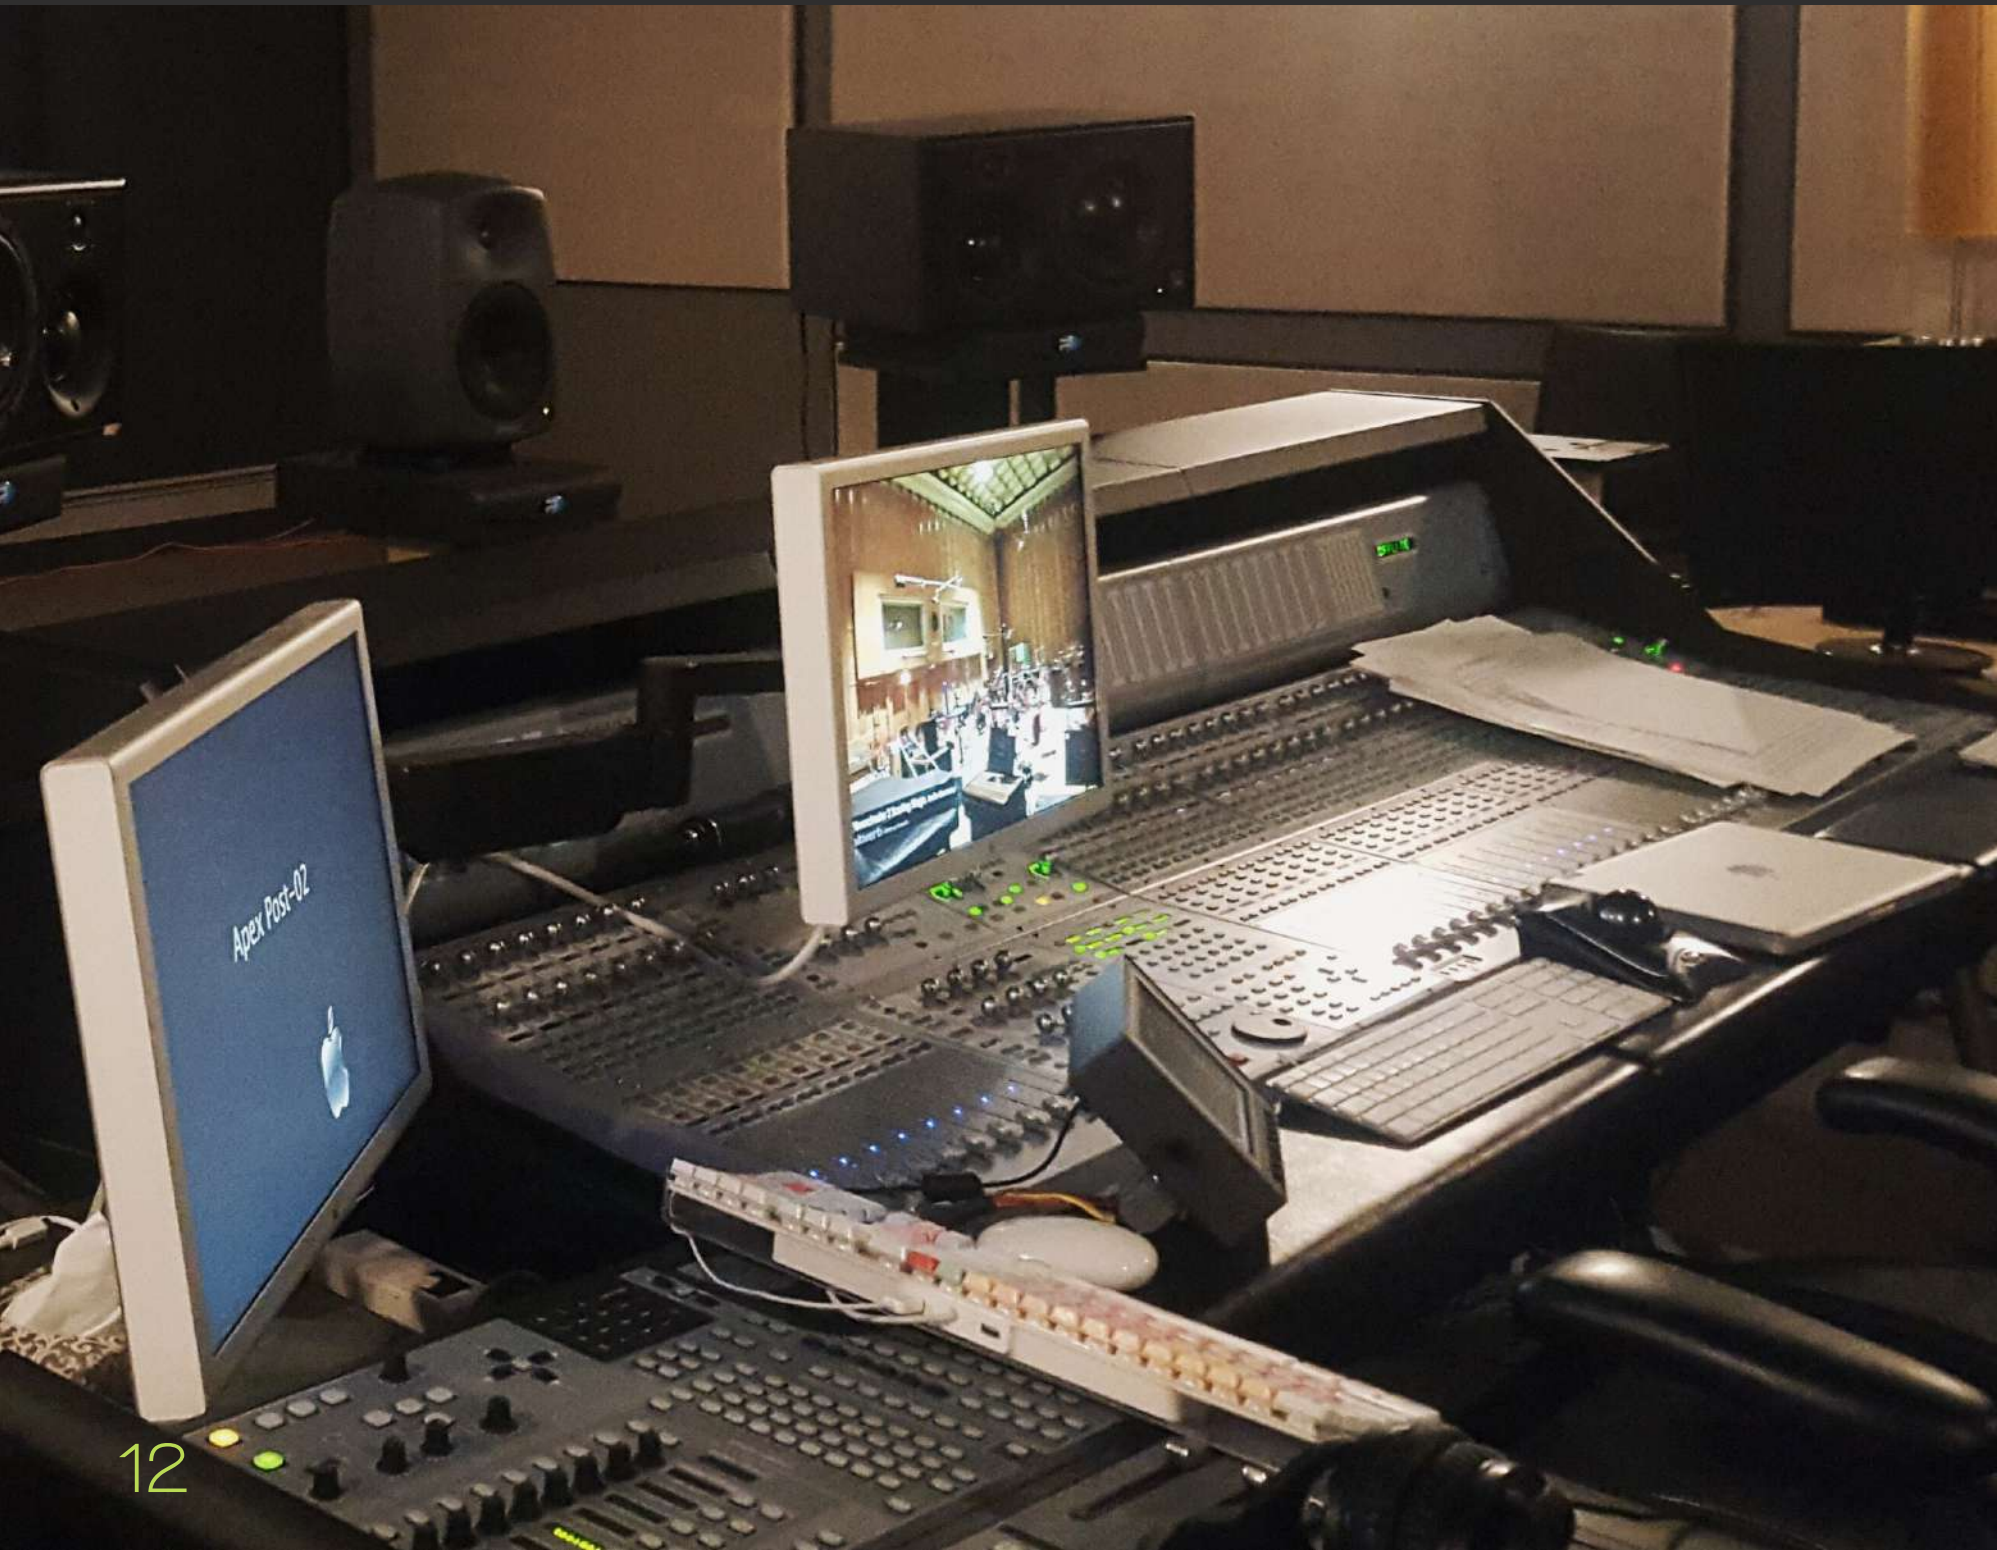

Many recordings that were once suitable for isolated listening may not be of appropriate quality when layered or added to other recordings with different characteristics.

Consistency and continuity is of paramount importance when immersing an audience into an illusory environment. Unintentional changes of audio quality can distract a participant during a moment of intense focus.

# SOUND MIXING:

"WORKING WITHIN AN ACCURATE SOUNDING ACOUSTIC SPACE IS CRITICAL TO PRODUCING A FINAL MIX THAT WILL TRANSLATE CONSISTENTLY BETWEEN LISTENING ENVIRONMENTS."

Dolby certified surround sound mixing stage that can simultaneously process over 500 tracks of audio.

Our large mixing stage measures 25ft x 35ft in a size representative of a public movie theater.

We also have smaller mix rooms that align with the acoustics of a typical home theatre setting.

We test and monitor all of our mixes through headphones to be sure they translate properly to the average player or viewer.

# ORIGINAL MUSIC

## COMPOSERS

2 members of our staff are experienced composers, and we have relationships with composers locally, nationally, and internationally.

## EXPERIENCED

Apex Post has composed, recorded, and edited music for films, documentaries, promo pieces, and special presentation projects viewed and experienced by thousands of audience members worldwide.

## MUSIC LIBRARIES

We also have access to several music libraries for placing “temp” music or licensing pre-recorded music for use in all forms and applications.

# VISUAL EFFECTS AND COLOR GRADING:

Apex Post offers a host of VFX and titling services that can be used for all genres and applications. From adding or removing objects or backgrounds, to enhancing looks, to creating and adding subtitles, Apex can enhance existing work or supervise a segment of an entire project.
